The World Survey of Islamic Manuscripts is a collective bibliographical work, which brings together the work of Muslim and non-Muslim manuscript scholars from all corners of the world. It is a rich collaboration to enhance the knowledge of the written heritage of the Islamic civilization.

The Al-Furqān Survey fills the gaps left by previous bibliographies to bring together and update most of the information they contain. The Survey aims to provide the reader with a guide to collections of Islamic manuscripts, details of access to these collections and their holdings, as well as information about particularly significant manuscripts which they contain.

The Al-Furqān Survey is the first ever attempt to account for all collections in all Islamic languages in over 90 countries of the world. It thereby fills a lacuna for collections not as yet catalogued and even for many catalogued collections where the work has remained incomplete.

Cover photograph: a folio from an undated (but probably 8th century AH) Cairo MS of “Al-Tawdīḥ li-Sharb al-Jāmī’ al-Sāḥīḥ” by ‘Umar ibn al-Muqaffa’ al-Anṣārī (d. 804/1401). It is written in Naskh Rīfā‘ script on thick, multi-coloured Arabic paper. Black ink is used for the main text, but chapter headings are written in gold, red and blue in both Thulū‘ and Rayhā‘ scripts.
