appreciation of scholarship and sincerity
This is a title catalogue of the Arabic MSS kept in the
Museums of Jos and the Lugard Hall Library in Kaduna.

The authors would like to thank Mr. R. Fagg for putting
the MSS of Jos Musuem at their disposal for the purpose of
cataloguing. They would also like to thank Al-Haji Mustafa
Coomassie for helping with some queries and for his patience
to catalogue the remaining MSS of the Jos collection which
are in Arabic script but in Fulani, Hausa and Yoruba Languages.
These are well over three hundred manuscripts. The authors
would also like to express their thanks to Al-Haji Unaru
Gunida, Speaker, House of Representatives, Kaduna, for sending
the Lugard Hall Library collection to them during their stay
in Zaria.

Arembe
July 1965
It is only fair to put on record that our knowledge of these manuscripts dates from April 1965 when Mr. B. Patel, then Director of Antiquities, Federal Republic of Nigeria, and Director of the Jos Museum in Northern Nigeria, who is currently the Curator of the Pitt-Rivers Museum, Oxford, kindly drew our attention to the Jos Museum's collection of Arabic manuscripts. He also stated that al-Hajji Mansur Cosmas of the Institute of Administration, Ahmadu Bello University, Zaria, had played the greatest part in purchasing the collection for the Jos Museum. Dr. A. A. Ayer, formerly the Curator of Jos Museum, and presently Lecturer at the A.O.A.M.I., University of London, had managed to purchase for the same Museum over a hundred of these manuscripts.

In the last two years we have been able to complete the present catalogue which contains over one thousand of these manuscripts, practically all that is kept at Jos Museum and thirty manuscripts kept in the library of Logiad Hall, Northern House of Representatives, Kaduna, Northern Nigeria.

It should not be inferred, however, that we are only aware of the presence in Nigeria of the Jos collection and that of Logiad Hall. We know of Nasar City University Library's collection which is much smaller than the Jos collection. We know of Sokoto Native Authority's collection and of al-Hajji Jumado, Deputy Sokoto's collection. al-Hajji Jumado himself had enough time to spare many hours to five consecutive days in January 1964 when we read and discussed with him various manuscripts in his private collection. We also know of the Judicial School's collection in Enugu and of the collection of the National Archives at Enugu. All these collections await cataloguing.

Moreover, we are told that the Jos collection is adequately representative of the various branches of study reflected by these Arabic manuscripts. This we can confirm after our examination of al-Hajji Jumado's collection, Logiad Hall and Kaduna's National Archives collections.

The main subjects covered by these manuscripts are: History, Religion, Language (Arabic Grammar), Poetry, Astronomy, Astrology, Mathematics, Folk-lore, Poesy, Geography, Education, Sociology, Logic and Jurisprudence (Ishma).
As far as the Arabic script is concerned, the majority of the manuscripts are written in Naskh script with some Thuluth letters. This Naskh has been analogous to our manuscript style, especially the cursive lettering and the placing of the dot for the letters گ and ى. Discursive points are not omitted and orthographic signs are used, almost in every manuscript and they are put in a colour which is different from that of the text. Special rules are used in writing those manuscripts. Even the later ones are not written with pens or fountain pens. This is still observed until now in both Zaria and Sokoto and may be in other towns in Northern Nigeria.

The ink itself was locally made and prepared by the copyist. The paper is of various kinds and comes mainly from Italy and Great Britain. This is indicated by the various trade marks. One should stress the various beautiful figures represented by these trade marks as described in different places of this catalogue.

In cataloguing these manuscripts we did our best to give the names of both books and authors with the spelling given in the manuscripts themselves. It was indeed rather difficult to identify authors in some cases, because their names are usually given after two pages or more in the text, on the one hand and, sometimes, the first pages were missing.

Finally we have to say that wherever it was possible we identified the missing authors and put their names between two brackets. Liverpool Library's manuscripts are given the abbreviation MSK while Joss's are MS. It may also be noticed that a small number of the MSS given in this catalogue are not commented upon by us. This was due to time pressure since we were to leave Northern Nigeria for final leave rather unexpectedly. As, therefore, thought it better to register these MSS than to leave them.
